

RETAIL BUILDINGS

Endless Possibilities

IMAR 

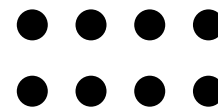

IMAR RETAIL BUILDINGS

Imar metal solutions let you fully customize your retail building. Unlimited possibilities to provide a unique character and personality with optimum advantages. Resilient, safe and durable with minimal maintenance. Added natural light in the interior ensures energy savings, while larger sizes mean shorter installation times.

ENGINEERS & FABRICATORS

ADDED VALUE

Singular Metal Solutions

At Imar we are specialists in engineering, developing and manufacturing all types of metal solutions for architecture. Unlimited solutions with technologically advanced metal processing to create exterior cladding in all shapes, volumes and textures imaginable in buildings around the world.

Know-How

Adquirido en la producción de más de 1 millón de m2 desde 2003

Bespoke Solutions

To meet aesthetics, performance and budget requirements

Global Reach

Spanning more than 30 countries in 4 continents

Heritage

Metal solutions since 1931

Holistic

From engineering and design services to ready-to-install products and system

Endless Possibilities

Through a broad range of materials, production processes and finishes

Excellence

Delivering on a promise from service to finished products

Advanced Technology

Guarantying reliability and standard of quality

Commitment

Towards innovation and continuous improvement

Collaborative Approach

To problem solving with partners towards common goals

ENDLESS POSSIBILITIES

01

MATERIALS

Location, the elements and durability direct the choice of materials. But you can also apply decorative criteria.

02

SHAPES

Metal cladding lets your building define its personality, volume and shape. Choose from our unlimited possibilities to make it unique.

03

FINISHES

Color, brightness and texture take on a leading role in your project. You decide. We offer an infinite range of choices.

04

SOLUTIONS

Imagine, dream, believe, explore... Our team of engineers and technicians develops successful solutions for your functional and creative needs.

01 MATERIALS

At Imar we offer comprehensive solutions for unique exteriors in all types of architectural metals: aluminum, steel, brass, zinc, copper and titanium. Long experience and technical and technological capability allow us to advise you on the right choice of materials in terms of appearance and durability.

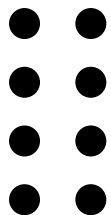

02 SHAPES

Our top-level technical capability allows for multiple variations of perforated, expanded, embossed, textured, and even variable geometry sheet metal. All types of volumes and shapes conceived by your designer to create exteriors with a unique personality.

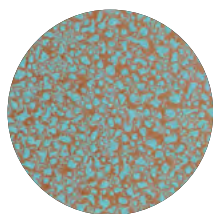

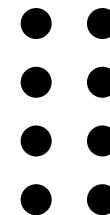

03 FINISHES

You can choose to paint your project in any color in the RAL chart or use our special textured paints that imitate different materials and patinas like weathering steel, copper and brass. You can also have your material anodized or enhance its personality with the natural appearance of the weathering, stainless steel and other textures.

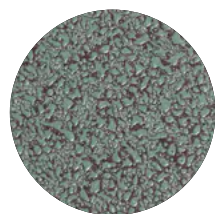

Unlimited Color Range

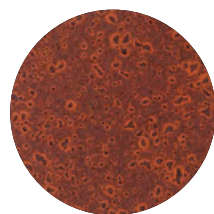

Apart from the RAL color chart, these are some of our textured colors
